Amazon 5 percent refund bonus increases spending power

H&R Block's collaboration with Amazon complements its value-focused, innovative products for tax season 2018. H&R Block desktop software products for tax season 2018 are available at hrblock.com and retail outlets nationwide. Continuing in 2018, H&R Block desktop products include a refund bonus promotion when purchased at Amazon.com. Key product enhancements include the addition of "drag and drop," which easily imports tax information from any source. "This 5 percent refund bonus provides an additional \$150 to an Amazon gift card, they would receive an additional \$150 for a total value of \$3,150 to spend easily on tax information. The bonus can offset the cost of the product itself."

'Drag and drop' makes switching to H&R Block easier, and other benefits also enhance value

Also new this year, with "drag and drop" it's easier for desktop software users to import last year's tax return from H&R Block or any tax prep service. This saves customers time by seamlessly prepopulating information on their tax return.

In addition to the maximum refund, 100 percent accuracy and 100 percent satisfaction guarantees for H&R Block DIY tax software clients, these are among the other benefits that make H&R Block products the best value in desktop tax software:

- Competitively priced products
 - Free In-Person Audit Representation from an H&R Block tax pro (some competitors charge \$49.99)
 - Unlimited free tax advice via live chat (some competitors charge \$19.99)
- Up to five federal returns can be filed for free
- Tax Identity Care™ can help better protect clients from tax identity theft with H&R Block's exclusive prevention and restorative services, and for only \$14.99 it can be added by all DIY clients.

"When picking a DIY product, seemingly similar products offered by different companies can cost considerably more when you add the same help that H&R Block DIY tax software includes. For example, a competitor's comparable Deluxe desktop software can cost \$60 more than H&R Block's Deluxe desktop software when taking into consideration all available features and services," Watts said.
