Forward-Looking Statements
This presentation contains forward-looking statements within the meaning of the securities laws. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words or variation of words such as "expects," "anticipates," "intends," "plans," "believes," "commits," "seeks," "estimates," "projects," "forecasts," "targets," "would," "will," "should," "goal," "could," "may," or other similar expressions. Forward-looking statements provide management's current expectations or predictions of future conditions, events or results. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future are forward-looking statements. They may include estimates of revenues, client trajectory, income, effective tax rate, earnings per share, cost savings, capital expenditures, dividends, share repurchases, liquidity, capital structure, market share, industry volumes, or other financial items, descriptions of management’s plans or objectives for future operations, products or services, or descriptions of assumptions underlying any of the above. All forward-looking statements speak only as of the date they are made and reflect the company’s good faith beliefs, assumptions and expectations, but they are not guarantees of future performance or events. Furthermore, the company disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions, factors, or expectations, new information, data or methods, future events or other changes, except as required by law. By their nature, forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. Factors that might cause such differences include, but are not limited to a variety of economic, competitive, operational, and regulatory factors, many of which are beyond the company's control, that are described in our Annual Report on Form 10-K for the most recently completed fiscal year in the section entitled "Risk Factors" and additional factors we may describe from time to time in other filings with the Securities and Exchange Commission. In addition, factors that may cause the company's actual estimated effective tax rate to differ from estimates include the company’s actual results from operations compared to current estimates, future discrete items, changes in interpretations and assumptions the company has made, and future actions of the company. You may get our Securities and Exchange Commission filings for free at our website at http://investors.hrblock.com. You should understand that it is not possible to predict or identify all such factors and, consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

Non-GAAP Measures
We refer to certain Non-GAAP financial measures in this presentation, including earnings from continuing operations before interest, taxes, depreciation, and amortization ("EBITDA"), and EBITDA Margin from continuing operations, calculated as EBITDA from continuing operations divided by revenues from continuing operations ("EBITDA Margin"). Non-GAAP financial measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with accounting principles generally accepted in the United States (GAAP). Because these measures are not measures of financial performance under GAAP and are susceptible to varying calculations, they may not be comparable to similarly titled measures for other companies. For a description of these non-GAAP financial measures, including the reasons management uses each measure, and reconciliations of these non-GAAP financial measures to the most directly comparable financial measures prepared in accordance with GAAP, please refer to our press release filed on June 11, 2019 and our previously filed press releases, both of which are posted on our investor relations website at http://investors.hrblock.com.

Market and Industry Data
The data included in this presentation regarding the tax preparation services industry, including trends in the market and the company's position and the position of its competitors within this industry, are based on the company's estimates, which have been derived from management’s knowledge and experience in the industry, and information obtained from customers, trade and business organizations, internal research, publicly available information, industry publications and surveys and other contacts in the industry. The company has also cited information compiled by industry publications, governmental agencies and publicly available sources. Although the company believes these third-party sources to be reliable, it has not independently verified the data obtained from these sources and it cannot assure you of the accuracy or completeness of the data. Estimates of market size and relative positions in a market are difficult to develop and inherently uncertain and the company cannot assure you that it is accurate. Accordingly, you should not place undue weight on the industry and market share data presented in this presentation.

Strategy Update
Strategic framework that will guide us over long term

- Elevate our talent and culture
- Own a sustainable brand position
- Win on customer experience
- Build operational excellence
- Invest for the long term
Wave Acquisition
Wave Financial: A rapidly-growing financial solutions platform for the small business market

Acquisition will accelerate H&R Block’s small business strategy, providing new growth opportunities
Wave will accelerate our strategy in the large and expanding small business market

**Large and Expanding Small Business Market**

- 31 million small businesses in North America
- Over 100,000 new small businesses created each month
- Freelancers: ~57 million today growing to ~87 million by 2027

**Simple Platform Empowers Small Business Owners**

- Many small business owners struggle with cash flow, bookkeeping, payroll and tax prep
- Financial mismanagement and outdated methods lead to failure
- Wave’s platform helps small businesses manage complex financial needs

**Opportunity for Synergies**

- Unlock revenue synergies from existing small business clients
- Attract new clients to the tax business through existing small business network
- Minimal overlap between services and technology

Wave’s robust platform serves the needs of small business owners

- Invoicing: FREE
- Payments: PAY-PER-USE
- Accounting Software: FREE
- Bookkeeping Services: MONTHLY
- Receipt Tracking: FREE
- Payroll: MONTHLY

Low customer acquisition costs combined with recurring revenue stream yields favorable customer lifetime value
Wave is growing organically and rapidly

400,000+ Active Customers

>80% Signups through Unpaid Channels

$40-45M Projected Revenue Contribution to HRB in FY20

25 Consecutive Quarters of Revenue Growth

Opportunity to increase brand awareness and platform offerings to accelerate growth
Transaction Summary

Company Information
- Wave Financial (waveapps.com)
- ~250 full-time associates
- Headquartered in Toronto, Ontario

Governance & Leadership
- Wave will operate independently within H&R Block
- Kirk Simpson to remain as CEO of Wave and report to H&R Block CEO Jeff Jones

Structure & Valuation
- Purchase price of $405 million, funded with available cash
- Additional financial performance incentives

Timing & Approvals
- Transaction is expected to close within the next few months
- Subject to customary closing conditions including regulatory approvals

FY20 Financial Outlook
## FY20 Financial Outlook

### Revenue Growth
- Modest growth in the tax business following a reset year
- Includes revenue contribution from Wave

### EBITDA Margin¹
- EBITDA dollar growth as cost reductions offset impact from Wave
- Revenue growth outpaces EBITDA growth, impacting margin

### Effective Tax Rate
- Rate may fluctuate due to unanticipated discrete items

<table>
<thead>
<tr>
<th>1.5% - 3.5%</th>
<th>24% - 26%</th>
<th>23% - 25%</th>
</tr>
</thead>
</table>

Outlook includes the following impacts from the Wave acquisition:

- Revenue contribution: $40 - $45 million
- Operating loss and related transaction costs: $25 - $30 million
- Purchase price amortization: $40 - $50 million

¹ EBITDA Margin is a non-GAAP financial measure. Specific quantifications of the amounts that would be required to reconcile the company’s EBITDA Margin outlook for FY20 are not available. Because of the variability of these and other items as well as the impact of future events on these items, management is unable to reconcile without unreasonable effort the expected range of EBITDA Margin for the fiscal year to a comparable GAAP range. Please see the Safe Harbor Statement at the beginning of this presentation for information on non-GAAP financial measures.
Capital Allocation
Capital allocation balances returns to shareholders with investments for long-term growth

1. Ensure adequate liquidity and maintain strong balance sheet
   - Ended FY19 in a strong cash position after another year of solid cash flow generation
   - Short-term liquidity needs funded with cash on hand and $2.0B line of credit which matures in September 2023

2. Invest in business
   - Disciplined investments in the business to deliver value for our clients and drive sustainable growth
   - FY19 investments in pricing, technology, and operational excellence
   - Expanding services and capabilities with Wave acquisition

3. Distribute excess cash to shareholders
   - Announced dividend increase for 4th consecutive year; total increase of 30% over this time
   - Extended share repurchase authorization through June 2022
   - Repurchased 7.9 million shares for $185 million in FY19; ~10% of shares repurchased since FY17
