

# Measuring our Footprint

Government agencies, investors, and other stakeholders are increasingly recognizing the risks that climate change poses to society, the environment, and businesses. To better understand, accurately address, and meaningfully reduce our own climate impacts, we conducted a carbon accounting, estimation, and modeling project this year with our emissions, related to our U.S. operations, totaling approximately 109,000 metric tons of carbon dioxide equivalent. This model includes estimated amounts of...

Calculations are in line with the [Greenhouse Gas Protocol](#).

Demonstrating a commitment to environmental risk management and transparency, H&R Block submitted a 2022 CDP response.

## IT Equipment Recycling

Over the last year, H&R Block continued to donate technology devices to nonprofit partners across 33 states, keeping technology out of landfills while helping underrepresented families connect to the internet and important services.

## Software Packaging

Our software packaging contains materials that come from sources designed to support forest conservation, as certified by the Forest Stewardship Council. This certification guarantees that products or goods come from responsibly managed forests that equitably provide environmental, social, and economic benefits.

## Deepening our Stewardship Responsibilities

As we proceed with evaluating and understanding how our operations interact with the environment, we remain committed to doing everything within our power to reduce negative impact. We will continue investigating and investing in ways we can reduce the resources we consume and waste we produce.
